EXPERIENCE

Robotics Operations & Software Support Engineer — R.O.B.O. Apr 2026 – Present

- Monitor robotic operations using real-time dashboards, logs, telemetry, connectivity, and task-execution data to identify abnormal patterns and support root-cause analysis.
- Support integrations across robots, backend servers, warehouse management systems, and software services using APIs, scripts, Linux/Unix diagnostics, and CLI tooling.
- Develop and maintain Python/Node.js automation utilities for diagnostics, data extraction, and operational reporting; troubleshoot incidents and escalate engineering issues with relevant logs and technical context.

Software Engineer — Brillio Technologies Jan 2026 – Apr 2026

- Designed scalable contact-routing systems with Amazon Connect supporting 200+ agents and ~5K daily requests, improving reliability and fault tolerance.
- Developed event-driven IVR workflows integrated with Amazon Lex for NLP-based request handling and automated resolution in a cloud environment.

Software Engineer — Deloitte May 2025 – Dec 2025

- Developed and optimized Node.js backend microservices in Linux environments, reducing API latency by ~25% and improving throughput under concurrent workloads.
- Built React components and REST API integrations and supported CI/CD pipelines, improving deployment automation, scalability, and reliability.

Software Engineer — Concordia University Makerspace Lab Jan 2024 – May 2025

- Designed and deployed a full-stack application used across the university by 100+ users, improving operational efficiency by ~40%.
- Developed backend services and optimized database workflows, reducing response time by ~30% while supporting 99% system availability.

Software Developer — Splash Distributors LLC May 2023 – Dec 2023

- Developed and maintained a web platform with inventory synchronization and automated product-publishing workflows, reducing manual update effort by ~30%.
- Enhanced responsive web experiences for promotional and special events, improving usability and supporting evolving business requirements.

Software Engineer — Tata Consultancy Services (TCS) Jan 2022 – Jan 2023

- Developed backend systems for high-volume enterprise applications, optimizing transaction-processing workflows and improving application performance by ~20%.
- Implemented encryption, authentication, and RBAC controls, reducing security-related access issues by ~25% and strengthening compliance.

PROJECTS

AI-Powered Customer Intelligence Platform — Machine Learning

- Built a Scikit-learn churn-prediction pipeline with feature engineering and preprocessing, improving prediction accuracy by ~25% and retention insights by ~30%.

Scalable Full-Stack Application — React, Node.js, AWS

- Developed and deployed a containerized full-stack application using React, Node.js, Docker, AWS EC2, S3, and CloudFront.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript
Frontend: React, HTML, CSS
Backend: Node.js, REST APIs, Microservices, API Integration
Cloud & DevOps: AWS (EC2, S3, CloudFront, Amazon Connect), Docker, CI/CD, Linux/Unix
AI/ML: Scikit-learn, NLP, Generative AI, Amazon Lex
Core CS: Data Structures & Algorithms, Distributed Systems, Database Systems

EDUCATION

M.S. Computer & Information Sciences — Concordia University Wisconsin May 2025

B.Tech. Computer Science — Aurora's Technological & Research Institute Jun 2022
